Yonave - 29/08/2013

Tambi n se puede encontrar el punto medio buscando en:

google

yahoo

bing

 

The image shows a search engine results page for the query "Punto medio". At the top, there are navigation tabs for "Web", "Im genes", "Maps", "Shopping", "V deos", "M s", and "Herramientas". Below the tabs, it indicates "Aproximadamente 1.492.000 resultados (0,35 segundos)". The first result is from Wikipedia: "Punto medio - Wikipedia, la enciclopedia libre" with the URL "es.wikipedia.org/wiki/Punto\_medio". The snippet describes it as a point equidistant from two other points. The second result is from "Punto Medio | Portada | Mares, 10 de Septiembre de 2013" with the URL "www.puntomedio.com.mx/". The snippet mentions it's a news website. The third result is a video from YouTube titled "Punto medio de un segmento - Vitutor" with the URL "www.youtube.com/watch?v=ef0mof2Z344". The snippet says it explains how to determine the coordinates of the midpoint. The fourth result is from "Punto medio" with the URL "www.ditutor.com/vectores/punto\_medio.html". The snippet mentions formulas and examples. At the bottom, there is a section for "Im genes de punto medio" with a small grid of four images showing geometric diagrams related to midpoints.
